OBJECTIVE

Product Owner / Game Designer with 2+ years building casual and puzzle mobile games, from concept to launch and optimization. I write PRDs, run backlogs and sprints, and use retention, funnel, and A/B test data to guide product and monetization decisions, including IAP and ads placements. I am looking for a Product Owner role focused on monetization, where I can grow retention and revenue for mobile apps in the global market.

SKILLS

Product	PRD Writing, Backlog & Sprint Planning, User Flow & UI Flow, Cross-team Coordination
Monetization	IAP & Ads Placement Design, Game Economy Balancing
Data	Retention & Funnel Analysis, A/B Testing, SQL, BigQuery, Firebase Remote Config, Python
AI	AI-assisted product design, documentation, and data analysis
Game Design	Core Loop, Level Design, Systems Design, Meta-Progression
Prototyping	Unity, Level Editor, Rapid Prototyping, Playtesting
Soft Skills	Analytical Thinking, Problem-solving, Creativity
Language	English (professional working)

EXPERIENCE

LIHUHU PTE. LTD. *Project Manager / Producer* **07/2026 – Present**

- Manage a portfolio of 7 live casual games running in parallel, with ~20M downloads (Woodber, Arrow 3D, and more), tracking and updating performance daily.
- Analyze retention, churn, and ads data with SQL on Firebase → BigQuery to find insights that improve D3 and D7 retention.
- Identify player pain points from data (where and why players quit) and translate them into new feature requirements.
- Evaluate ad frequency and first-ad timing in Firebase Remote Config by user segment, and define A/B test proposals to balance ad pressure and retention for new users.
- Work on a major project with Rovio to build a casual puzzle game on the Angry Birds IP.
- Plan and manage this title with a 12-person team (Dev, QA, GD, Art) on a 10-week roadmap with prototype and MVP milestones.

Playza *Product Owner / Game Designer* **02/2026 – 07/2026**

- Owned a casual puzzle game end-to-end, from concept to launch: core gameplay, levels, and features.
- Translated requirements into PRDs with clear acceptance criteria for Dev and QA, using AI tools to iterate faster.
- Ran sprint planning and coordinated Dev, Art, and QA to deliver the game on schedule.
- Analyzed retention and level data to identify drop-off points and prioritize fixes for difficulty and the game economy.
- Validated new ideas with playable Unity prototypes before committing development effort.
- Defined a meta-progression system (mascot collection) to give players long-term goals and improve retention.

Maplelabs *Product Owner / Game Designer* **08/2024 – 11/2025**

- Drove D1 retention from 40% to 46% by prioritizing level testing and optimization.
- Defined IAP and ad placement strategy, and balanced the game economy.
- Used retention and funnel data to drive product decisions, and ran A/B tests to improve the game.
- Defined core features and UI flow, and delivered on time with Dev, Art, and QA.
- Designed and balanced 1,000+ game levels in Unity.

Rainbow5s *Game Designer (Intern)* **04/2024 – 08/2024**

- Supported game design: mechanics, level design, and UX for casual mobile games.
- Designed and balanced levels, and ran playtests before and after updates.
- Wrote game design documentation and worked with the Dev and Art teams.
- Used data to support design decisions and improve retention.
